

ISAAC MSIZA

Full Stack Developer

0712848104

itmsiza1994@gmail.com

390 Mashamplane, Klipgat, Pretoria

SUMMARY

Innovative and motivated software developer with a strong foundation in computer science and a passion for creating software solutions. Skilled in both frontend and backend development, with a focus on building intuitive and user-friendly applications. Proven ability to work independently and collaborate effectively in team environments. Excited to leverage technical skills and project experience to contribute to a dynamic software development team.

EDUCATION

Tshwane University of Technology

National Diploma: Intelligent Industrial System 2016–2019

Tshwane University of Technology

Advanced Diploma: Computer Systems Engineering 2021 – 2022

SKILLS

- Programming Languages: C++, Java, Python
- Frontend: HTML, CSS, JavaScript, React.js, Next.js
- Backend: Node.js, Express.js, REST API, Prisma, Firebase
- Version Control: Git, GitHub
- Database: PostgreSQL, MySQL, MongoDB

HOBBIES

- Creating personal projects
- Gaming
- Creating Technical Content
- Reading Tech related Content
- Learning New Technologies

PROFESSIONAL EXPERIENCE

- Web development with expertise in HTML, CSS, JavaScript, React.js, Node.js, and Express.
- Proficient in database management using MongoDB and MySQL, with experience in designing and optimizing database schemas.
- Skilled in agile methodologies, with a proven track record of delivering high-quality software products on time and within budget.
- Strong problem-solving abilities and attention to detail, with a passion for finding innovative solutions to complex technical challenges.
- Excellent communication and collaboration skills, demonstrated through successful cross-functional teamwork and client interactions.

PROJECTS

PermitEase – Digital Transport Permit System

Technologies: React.js, Next.js, Tailwind CSS, HTML, REST API, Firebase

- Developed a full-stack web application to digitize the transport permit process, replacing traditional physical and manual procedures with a streamlined, digital platform.
- Implemented a modern UI using Tailwind CSS for responsive and user-friendly design.
- Integrated Firebase backend for secure data management, authentication, and real-time updates.
- Designed and consumed REST APIs to handle application workflows and permit validation efficiently.
- Enhanced accessibility and speed by applying Next.js for server-side rendering and performance optimization.

Doctor Appointment Booking System

Technologies: Next.js, Prisma (PostgreSQL), NextAuth, JWT, Firebase (Real-time Integration)

- Built a comprehensive appointment booking platform enabling patients to schedule appointments based on doctor availability.
- Used Prisma ORM with PostgreSQL for robust data handling and relational database management.
- Developed secure authentication using NextAuth and JSON Web Tokens (JWT) for session management and role-based access (User, Doctor, Admin).
- Integrated Firebase for real-time notifications, allowing instant updates for bookings and appointment changes.
- Leveraged Next.js API routes to create scalable and maintainable backend endpoints for seamless data exchange.
