

SUMMARY

Java Backend Developer and IT Graduate with 2+ years of web development experience. Skilled in Spring Boot, Spring Security, PostgreSQL, Redis, React.js, and Next.js. Experienced in building REST APIs, authentication systems, and full-stack web applications.

EDUCATION

Tshwane University of Technology

Advanced Diploma: Computer Systems Engineering
2021 – 2022

Tshwane University of Technology

National Diploma: Intelligent Industrial System
2016– 2019

SKILLS

- Programming Languages: Java, C++, Python, TypeScript
- Web Development: HTML, CSS, React.js, Node.js, Spring Boot
- Database Technologies: MongoDB, MySQL, PostgreSQL, Prisma
- Authentication & Security: NextAuth.js, JWT (JSON Web Tokens)
- Version Control: Git, GitHub
- Communication

HOBBIES

- Creating personal projects
- Gaming
- Creating Technical Content
- Reading Tech related Content
- Learning New Technologies

WORK EXPERIENCE

Software Engineer – EaziRide, Sandton

Jan 2025 – Dec 2025

- Built and maintained core backend services using Spring Boot and PostgreSQL.
- Designed and exposed RESTful APIs handling data management, authentication, and real-time notifications via WebSocket.
- Implemented secure JWT-based authentication with role-based access control and token refresh using Spring Security.
- Deployed and configured backend services with database migrations and Redis caching for optimized performance.

Web Developer – Solvay Polymers and Chemicals (Pty) Ltd, South Africa

Feb 2022 – Jan 2023

- Developed and styled responsive web applications using HTML, CSS, JavaScript, React, and Next.js.
- Built RESTful backend services using Java and Spring Boot, connecting frontend interfaces to dynamic data sources.
- Applied Tailwind CSS for modern, interactive UI design with a focus on responsive layouts and consistency.
- Strengthened debugging, problem-solving, Git version control, and collaborative development skills.

Web Developer – Zentago, Midrand

Apr 2019 – Mar 2020

- Created web pages using HTML, CSS, JavaScript, jQuery, and Bootstrap.
- Enhanced website responsiveness and layout structure.
- Gained foundational experience in frontend development and UI design.

PROJECTS

StayEase – Hotel & Accommodation Booking System

Live Demo: <https://accommodation-booking-system.vercel.app/>

GitHub: <https://github.com/ITMsiza/Accommodation-Booking-System.git>

Tech Stack: Java, Spring Boot, Spring Security, JWT, PostgreSQL, Redis, WebSockets, Flyway, Next.js, React, TypeScript, Tailwind CSS, TanStack Query, Zustand

- Built a full-stack hotel and accommodation booking platform with role-based authentication (Guest, User, Admin).
- Implemented JWT authentication with refresh tokens and protected route middleware.
- Developed real-time booking notifications using WebSockets (STOMP).
- Designed a RESTful API with Spring Boot and Spring Data JPA, handling rooms, reservations, and reviews.
- Built an Admin Dashboard with live KPI statistics, booking management, and review moderation.
- Designed responsive, modern user interfaces with Next.js 15 App Router, TypeScript, and Tailwind CSS.
- Integrated PostgreSQL with Flyway migrations and Redis caching for optimized performance.

Doctor Appointment Booking System

Live Demo: smartcare-booking-v16e.vercel.app

GitHub: <https://github.com/ITMsiza/smartcare-booking.git>

Tech Stack: React, Next.js, Firebase (Authentication & Realtime Database/Firestore)

- Built a full-featured appointment booking platform enabling patients to schedule appointments based on doctor availability.
- Implemented Firebase for secure authentication and role-based access control (User, Doctor, Admin).
- Implemented secure data storage and structured collections in Firestore to ensure fast and reliable data retrieval.
- Added features for doctor reviews and ratings to help users make informed decisions when choosing a healthcare provider.
